MAPP 11981

A herbicide recommended for the post-emergence control of a wide range of broad-leaved weeds in winter sown cereals.

A suspension concentrate formulation containing 480 g/l (40.6% w/w) bifenox.

Warning

Very toxic to aquatic life with long lasting effects.
Contains 1,2-benzisothiazol-3(2H)-one. May produce an allergic reaction.
Keep out of reach of children.
Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for empty, clean containers which can be disposed of as non-hazardous waste.

To avoid risks to human health and the environment, comply with the instructions for use.

R3.0.6 MAY18

SAFETY PRECAUTIONS

Operator Protection
Engineering control of operator exposure must be used where reasonably practicable in addition to the following personal protective equipment.
WEAR SUITABLE PROTECTIVE GLOVES when handling the concentrate.
However, engineering controls may replace personal protective equipment if a COSHH assessment shows they provide an equal or higher standard of protection.
WASH CONCENTRATE from skin and eyes immediately.
WASH HANDS AND EXPOSED SKIN before meals and after work.
When using do not eat, drink or smoke.
Keep away from food, drink and animal feedingstuffs.
KEEP OUT OF REACH OF CHILDREN.

Environmental Protection
DANGEROUS TO FISH OR OTHER AQUATIC LIFE. Do not contaminate water with the product or its container.
Do not clean application equipment near surface water. Avoid contamination via drains from farmyards and roads.

Storage and Disposal
KEEP IN ORIGINAL CONTAINER, tightly closed, in a safe place.
DO NOT RE-USE CONTAINER for any purpose.
If you feel unwell, seek medical advice (show label where possible).

IMPORTANT INFORMATION
FOR PROFESSIONAL USE ONLY AS AN AGRICULTURAL HERBICIDE

DIRECTIONS FOR USE

IMPORTANT: This information is approved as part of the Product Label. All instructions within this section must be read carefully in order to obtain safe and successful use of this product.

General Information
FOX® is a selective herbicide absorbed by the foliage, emerging shoots and roots of susceptible weeds. It is to be used to control a wide range of weeds in winter wheat, winter barley, winter rye and winter triticale.

RESTRICTIONS
DO NOT APPLY FOX to any crop suffering stress at the time of application from factors such as herbicide damage, physical stress, cold weather, periods of drought, if rain or frost is expected, or if the crop is wet.
Avoid drift onto broad-leaved plants outside the target area.
Crops should not be re-entered until spray residues are dry.

</table>

S  = Susceptible, complete or near complete kill  
MS = Moderately susceptible, effective suppression with or without mortality  
MR = Moderately resistant, temporary suppression, the duration and degree depending on the vigour of the crop and weather
SPECIFIC CROP INFORMATION
FOX can safely be used on winter wheat, winter barley, winter rye and winter triticale.

Rate of Use and Volume
Apply 1.5 litres/ha in 200-400 litres water/ha. Use the higher volume where crop or weeds are dense to ensure good coverage. Pressure 1.5-3.5 bar as a MEDIUM quality spray defined by BCPC.

Timing
Make one application from the 5 true leaves to before second node detectable stage, (BBCH 15-31).

Mixing
Before spraying it is important to check all hoses, filters and nozzles and to ensure that the sprayer is clean and correctly set to give an even application at the correct volume.

Half-fill the spray tank with clean water. Add the required amount of FOX and begin agitation. Add the remainder of the water and continue agitation until spraying is completed.

Wash equipment thoroughly after use. Fill the tank with clean water and leave overnight. Spray out before storage or using other products. Traces of the product may cause damage to susceptible crops sprayed later.

DISCLAIMER/CONDITIONS OF SUPPLY
The specified properties of our products and the mode of application stated on this label have been established on the basis of research and experience. Products conform to specification at the time of delivery but, as we exercise no control over their subsequent storage, handling, mixing or use or the weather conditions before, during and after application, all of which may affect the performance of the products, no responsibility or liability will be accepted by us or our re-sellers for any failure in performance, damage or injury to person or property whatsoever arising from the storage, handling, application or use of the products. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in or make recommendations concerning the use of such products. We recommend you contact your dealer to request advice on the suitability of this product for any new and/or unusual growing methods or for new varieties not listed on this label.
